

EBARA

pumpsebara.com

Plumbing submersibles and horizontal clean water end suction and vertical multistage centrifugal pumps. The clean water pumps can be used in chilled, condenser, hydronic heating, domestic water, and domestic hot water applications. Submersible pumps include any sump and sewage lift station application for commercial and residential applications including elevator shaft sump drainage applications.

NAMCO Div.

namco-div.com

Up to 6 variable speed pumps in parallel operation, skidded with full controls. Pumps sequence on/off to maintain water demand, so there is always adequate pressure maintained. These pressure boosting systems are used in commercial, industrial, municipal, and residential applications.

Hays

haysfluidcontrols.com

Mission Critical Environments top rated Control Valve is ideal for data centers or military applications.
